

Couple Classic, C4799 y C4800

SHARED TIME, SHARED STYLE

The Candino C4799 and C4800 from the Couple Classic collection embody timeless elegance, balance, and a shared sense of style. Conceived as a perfectly coordinated pair, these Swiss Made timepieces unite technical precision with a refined contemporary-classic aesthetic—crafted for modern couples who value harmony while preserving individuality.

The collection introduces variety within a cohesive design language: four color options for men and six for women, enabling personal expression while maintaining a strong visual connection between both watches.

Defined by clean lines, balanced proportions, and versatile dial tones, the models transition effortlessly from everyday wear to formal occasions, ensuring enduring sophistication in every setting.

At the heart of the collection, each timepiece stands out through its refined yet contemporary character. The stainless steel case, paired with an integrated bracelet, offers both durability and comfort, while its subtle angular geometry brings a modern edge to a timeless silhouette.

The textured dial—available in multiple tones—features a delicate radial pattern that enhances depth and light play. Applied hour markers and bold hands ensure optimal legibility, while the fluted bezel and discreet date window at 3 o'clock add a touch of elegance and practical functionality. Protected by a scratch-resistant sapphire crystal and completed with a seamlessly integrated steel bracelet, each watch delivers a cohesive, premium feel.

Together, the C4799 and C4800 reflect Candino's commitment to Swiss quality, technical reliability, and enduring design—offering a harmonious pair of timepieces made to accompany every moment, together or apart.
