MY TIME

CONTROLLED TRANSPARENCY, BY FESTINA SWISS MADE

The architecture of time, in motion

With **RIVÉ SQ, Festina Swiss Made** unveils a contemporary interpretation of the automatic skeleton watch — one that is bold, architectural, and unmistakably modern.

Comprising four models crafted in 316L steel, the line shares a single DNA and a rigorous design philosophy. Each variation reflects absolute coherence between case, bracelet, movement, and finish — reinforcing the harmony between technical construction and visual identity.

A structured, deliberate aesthetic defines RIVÉ SQ: precise lines, balanced proportions, and a clear commitment to integrating movement and design into one unified statement.

The collection consists of four references:

- 316L steel with natural silver finish - F20069/1
- 316L steel with black PVD treatment - F20070/1
- 316L steel with blue PVD treatment - F20071/1
- 316L steel with green PVD treatment - F20072/1

High-resistance sapphire crystal

Water resistance: 10 ATM

The integrated 316L steel bracelet naturally extends the lines of the case, creating a harmonious silhouette defined by balance and modernity.

RIVÉ SQ unveils its movement through a masterfully openworked construction. The dial gives way to depth and perspective, revealing the precision of its mechanical architecture and enhancing the three-dimensional presence of the watch.

On RIVÉ SQ, the PVD treatment goes beyond the exterior components. It also enhances the visible elements of the movement itself, strengthening the visual impact and chromatic identity of each model. The bridges, main plate, and oscillating weight are finished in the same tone as the case and bracelet.

This deliberate choice creates a rare sense of visual continuity. The watch does not simply reveal its mechanics — it orchestrates them with coherence, transforming technical expression into a fully integrated design statement.

A SWISS MOVEMENT SIGNED BY SOPROD

At the heart of the watch beats a Swiss automatic movement developed by Soprod, part of the Festina Group — a recognized name in Swiss watchmaking, renowned for the reliability and precision of its calibres.

FESTINA RIVÉ SQ

Automatic watch	25 jewels
Soprod P024 SQ	42.5 mm 316L stainless steel case
Maison calibre	316L stainless steel bracelet
Power reserve: 38 hours	Sapphire crystal
Frequency: 28,800 vibrations per hour (4 Hz)	Water resistance: 10 ATM
11½''' round calibre	Recommended retail price: €990.00

Designed to complement everyday life, **RIVÉ SQ** seamlessly blends strength with sophistication. Positioned as a compelling offering in the Swiss Made automatic skeleton watch segment, it unites technical mastery, distinctive design, and strong aesthetic coherence.

Created for those who appreciate visible mechanics and architectural watchmaking, RIVÉ SQ showcases its automatic movement through a bold skeletonized display — revealing the very heart of the timepiece.

Confident in its identity, it embraces its style, expresses its character, and affirms its DNA with clarity and purpose.

With RIVÉ SQ, **Festina** reasserts its ambition: to deliver contemporary, accessible, and daring Swiss watchmaking that stands out without compromise.

Recommended retail price: €990
