

## Candino Lady. Flower inspiration

This season Candino has found inspiration in nature. The elegant Swiss brand presents two very feminine 3 had models, with sapphire glass and a 30 meters water resistance, and where flowers are the main protagonists.

The C4720 model, with a case diameter of 33.50mm, consists of 6 watches in pastel tones, where the leather strap combines with the tone of the flowers located on the dial. The hands and crown in pink gold tones, and the zircons featured on the dial and marking the 12, 9 and 6 make this watch an ultra feminine model, ideal for the spring/summer season.

The C4721 version has a 33mm case and a rose in the decorative dial with pink IP treatment, which matches the hands. Zircons play an essential role in this model, since they are found throughout the bezel and in the indexes. The image of the brand located at 12 and the crocodile-effect leather strap are also to be noted.

C4720/5
