FESTINA & SWAROVSKI

Ceramic marks an impressive return to Festina, with two new models for women. Not only do they have ceramic as the main and noble material, but they also include Swarovski Crystals in the indexes. Apart from the 35mm ceramic case, the bracelet perfectly combines ceramics with stainless steel details, which gives the model more originality.

The multifunction version (F20497) is equipped with sapphire crystal, while the 3-hand model has a hardened mineral one. Both have 50m (5 BAR) water resistance and are available in 3 ceramic colours: white, black and dark blue.
