

CHRONO BIKE 2020

The easy-to-wear Chrono bike

Together with Richard Virenque, Festina launches the 2020 edition of the iconic Chrono Bike collection. The sportiest collection of the brand is presented this year with a lighter and more compact design but without losing any of its sports inspiration or the spirit that has always defined it.

The new collection with a 44.50mm diameter case, hardened mineral glass and water resistant to 100 meters, comes in 6 stainless steel bracelet models and 8 with silicon straps. The "full steel" versions with more subtle coloured dials, have a half matt and half polished finish that gives a more original look. Apart from the obligatory black dial, the silicon versions are more daring with vivid dial colours such as yellow, orange or light blue.

Special Edition F20524 / 1 - F20525 / 1

The 2020 collection presents two versions of the Special Edition. Both with hardened mineral glass, the F20524 is made of stainless steel with a dark blue IP treatment and the F20523 is the black version. In both cases the details of the watch, such as: the indexes, the needles, the sub-dials, the push-buttons and some details on the bracelet, are made of steel with a copper coloured IP finish.

Limited Edition

Not forgetting the most exclusive Chrono Bike in the collection: the Limited Edition F20527 / 1, with 5000 unique and numbered pieces. This model, available for the real fans, is made of stainless steel with a Gun Metal IP treatment and boasts a scratch-resistant sapphire crystal. In addition, it includes an interchangeable black silicon strap as a gift and the tool to be able to change it at home, without the need of a watchmaker.
