## The new collection of Jaguar Balancier automatic watches is inspired from the excellence of Swiss watchmaking

The Jaguar Balancier J965 – J966 – J967 collection offers excellence and quality, with 11 new proposals for men's watches that will win over Swiss fine watchmaking enthusiasts due to the maximum precision and extreme reliability of the exclusive proprietary-manufactured Newton movement.

Jaguar Balancier is an entirely Swiss-made collection that is characterised by high technical standards and a design with essential aesthetics that conceals a highly complex mechanism. From the opening to the six o'clock point, you can see the beating heart of the watch: the balance wheel. The visual experience is

impressive. It is fascinating to observe the harmony of the automatic movement with 44 hours of power reserve, 23 jewels and dual-cone INCABLOC® anti-shock protection.

Protected by a sapphire crystal, the patented Newton Swiss-made movement is visible through the transparent case back, which reveals the oscillating weight and, in particular, the distinctive rotor with the Jaguar logo. On the back of the case, the Jaguar logo is engraved at the top and the model references on the bottom, with the features that make this sophisticated watch special marked on the sides.

The **J965/1/2/3/4/5** is distinctive due to its 41.50 mm stainless steel case in natural steel colours and the stainless steel wrist band fitted with two safety buttons on both sides of the clasp to prevent accidental opening. The dial is made with the Guilloché Clous de Paris technique in the centre with hour markers in Arabic (J965/1) and Roman (J965/2) numerals.

Depending on the style chosen, it is available in three different colours: navy blue, forest green and black (J965/3/4/5) with baton hour markers.

Jaguar enhances this extraordinary collection with four models that are distinctive because of their colours, which give them an elegant appeal. The **Jaguar Balancier J966/1/3/4/5** range is also characterised by a 41.50 mm stainless steel case featuring a Guilloché navy, green and black dial paired with a crocodile-effect leather wrist band to create a tone-on-tone or contrast effect, hour markers with Arabic numerals (J966/1) and batons (J966 3/4/5).

The **J967/1/2** series completes the collection. A sophisticated and vintage style with a 41.50 mm rose gold stainless steel case and a brown crocodile-effect leather wrist band. The large white dial features a Guilloché work in the Clous de Paris motif, with Arabic (J967/1) and Roman (J967/2) numeral hour markers.

**Jaguar Balancier** is an essential classic for those seeking prestige and exclusivity in traditional watchmaking. It is a timeless collection that embodies the elegance of a sophisticated style.

## **FESTINA GROUP**

With over 30 years of history, the Festina Group is today a prestigious international company specialized in the production and marketing of movements and precision parts for well-known watchmaking brands. To date, the Group markets 6 watch brands for the traditional market (Calypso, Lotus, Festina, Jaguar, Candino and Kronaby) and 2 jewellery brands (Lotus Style and Lotus Silver). The headquarters of the group are in Spain, while the main production centers are in Switzerland. Today the Group has seven subsidiaries (France, Germany, Italy, Benelux, Switzerland, Czech Republic/Poland and Chile), is present in over 90 countries on 5 continents and sells 5 million watches a year. The quality of the product, the excellent know-how and the special attention paid to the after-sales service contribute to making Festina Group the leading company in many strategic markets.
